

yCloudx

Manage Your Data Effortlessly

Change the Way You Work

Technology is the way forward. Most businesses go on the offensive and use technology to help them stay agile, streamline processes, and find greater efficiencies across their organizations.

yCloudx is designed to simplify your business operations and make it manageable by using digital technologies. This transformation helps your business so you can embrace change with confidence. Our combination of Computerized Maintenance Management System (CMMS) and Enterprise Resource Planning (ERP) solutions as well as Internet of Things (IoT) features help drive productivity because they are simple to learn and use. We deliver increased agility so your organization can adapt quickly to change, connect more easily with your clients, and optimize your supply chain.

Are you keeping up with the technological evolution in the workplace? Connect with us and together with *yCloudx*, we help you to build a better future, a more secure business, and a better way to keep our business running more efficiently.

History

yCloudx was fully developed by practitioners in Malaysia that have more than 15 years of experience in building, facility and exhibit maintenance combined with information technology.

It is 100% developed and maintained by experts and specialist from Lestari Global Sdn Bhd (LGSB). Till today, LGSB's team constantly upgrades and adds new features into the system.

Initially, the system was used particularly for Petrosains, KLCC. It has benefited its users a lot in terms of efficiency and operational effectiveness. For that reason, its usage was further expanded to other sites as well to assist their maintenance operation based on their unique needs after a few years of development, research and enhancement.

Now, *yCloudx* provides CMMS, ERP, and IoT solutions that helps strengthen your position in the marketplace and provide the backbone of an agile, flexible system that helps your business grow, adapt quickly to change, and take advantage of new business opportunities.

Do I need to install additional software?

Absolutely not. *yCloudx* works perfectly with every major web browser in the world. Runs smoothly on any PC, MAC, iOS/Android Smartphone or tablet.

What platform we provide for *yCloudx*?

yCloudx was created for the web, on the web. There are no installations or downloads needed to work with *yCloudx*, and you can access your information from any web connected device.

Can *yCloudx* help track equipment maintenance?

Whatever the mix of equipment, people and energy use, *yCloudx* helps your business success by keeping assets working as much as possible with minimal downtime using properly scheduled maintenance procedures.

Are work orders date/time recorded?

yCloudx's workflow is fluid. A work order is time stamped with a generation date and all other statuses through its lifecycle. A full history of every work order occurrence is always available within each work orders.

What other features in *yCloudx*?

yCloudx also offers ERP and IoT system solutions for your business. ERP stands for enterprise resource planning which aims to increase productivity of companies and manage costs. IoT (Internet of Things) helps in monitoring and control devices from the system to increase efficiency. *yCloudx* offers organizations to better manage their business in one system including:

ERP

- Leave management system
- Claim management
- Licensing and certificate management
- Document management system
- Payment order system (Quotation, PO, Invoice)
- Finance (Work order Cost)
- Attendance system
- Tender Management System
- Project management

IoT

- Develop based on client's requirements.
 - E.g.: - Temperature, Humidity and Pressure monitoring System
 - Face Recognition Attendance and Temperature System
 - Vibration, Electric Usage, Water, and Air Quality System
 - Home Automation System

Aside from the above the features, *yCloudx* is constantly growing and improving to become a complete CMMS, ERP, and IoT system.

Who does the data belong to?

The information that you enter inside of your *yCloudx* account is your property and you can export it from the software anytime. Our side only provide the software as a medium for the information to be recorded and analyzed easily. In simple words, our clients rent the software from us, but the data is 100% owned by clients. We make sure it is safe and backed up regularly for you.

How secure is your data protection?

The security of your data is important to us. We practice the best measures to ensure the data is securely protected such as systematic programming, using the up-to-date technology/software/hardware, SSL (lock green bar) – to encrypt every transmitted data, security enhancement in all aspects (coding, server and etc.), anti-malware/firewall, top server specifications and etc.
